

Report Date: October 2024

## Strategy Description

### Growth of 1,000

The strength of ProfitScore's Regime-Adaptive Multi-Strat Program (PRAM) lies in its ability to measure changing market dynamics and systematically trade based on market states. Each highly liquid program uses unique sources of information to make trading decisions, reducing investment model correlation. The equity program places trades in S&P 500 Index securities depending on the market's High Vol or Low Vol state. The program's US Treasury allocation systematically places trades in longer-dated US Treasury index securities based on Risk-On and Risk-Off market states. This program's most significant value generally occurs during periods of high volatility and market stress when many other strategies are faced with performance challenges.

### Risk/Return

## Key Features

- Highly liquid, transparent investments
- Tactical models to minimize systematic risk
- Multiple constructs to adapt to specific market states
- 60/40 allocations to tactical Equity and Treasury components
- Long and short positions

### Monthly Returns
